- Types of Internal Tables
- Creating and Processing Internal Tables
- Joins

IT EDUCATION  
CENTRE

## ABAP Programming Language

- Data Types
- Input/output Statements
- System Fields
- Conditional Statements
- Loops
- Field Symbols.

## Modularization

- Macros
- Include Programs
- Sub Routines
- Function Modules
- Type pools

## Debugger

- Breakpoints in program
- Debugging Techniques in ABAP

## Report Programming

- Classical
- Interactive
- ALV
- Selection Screen

## Dialog Programming

- Screen Painter
- Flow Logic
- Layout
- MenuPainter

IT EDUCATION  
CENTRE

## Performance Tuning

- Types of Program analysis
- Static Checks
- Short Dump Analysis
- Performance Tools Runtime Analysis SQL Trace

## Data Migration

- Data Migration reports
- Batch Data Communication (BDC)
- Legacy System Migration Workbench (LSMW)

## Forms

- SAPscript
- Smartforms

## Enhancements

- User Exit
- Customer exits
- Business Add Ins

## Concepts of

- Business Application Programming Interfaces (BAPI)
- Remote Function Calling (RFC)
